

The Fertility Doctor Is In!

The Fertility Doctor Is in! Source: wptv.com/news Date: 07/14/08A new London study shows acupuncture is of no benefit to increasing pregnancy. Someone should inform Dr. Zoll, his success rate is 46% even after IVF fails.

Many couples having trouble conceiving are increasingly turning to alternative

therapies like acupuncture. There are only 50 acupuncturists in the country who specialize in reproductive medicine.

Many couples having trouble conceiving are increasingly turning to alternative therapies like acupuncture. There are only 50 acupuncturists in the country who specialize in reproductive medicine.

The success rate of one local doctor is making his office the place where miracles are born.

Sue Williams is showing off her miracle boy, Jaxson Kane, born May 2nd at 8 pounds 13 ounces.

"Oh, he is so beautiful."

But, Jaxson might not be here without the help of acupuncturist, Dr. Stuart Zoll of Boca Raton.

"A very healthy baby boy. Their first. After trying IVF twice and failing, the acupuncture really helped them have this child," says acupuncturist Dr. Stuart Zoll.

Dr. Zoll works hand in hand with invitro fertilization specialists, oftentimes after IVF has not worked.

But, some couples with fertility problems are skipping the IVF and coming straight to Dr. Zoll.

Back in October, Pam Ross and her husband Robert concluded 3-months worth of acupuncture and massage. Two weeks later, they were expecting.

"Our OBGYN said there could possibly be a problem. So we went to a reproductive endocrinologist. He found there was a problem and gave us our options, which led us to Dr. Zoll," says expectant Mom, Pam Ross.

"I honestly believe with Dr. Zoll's expertise, he's the one who helped us get to where we are today," explains Ross.

Dr. Zoll treats the toughest cases. Many patients are coming to him as a last resort. Yet, his success rate is 46 percent.

"Getting pregnant is just the first step. Taking home a baby is really the goal. Not everybody who gets pregnant is able to take home a baby. Our success rate is based on like with Sue, taking home a baby," says Dr. Zoll.

And it's moments like this that make Dr. Zoll's job worth its while for both him and his patients.

New Mom, Sue Williams says "I should have done this year's ago. It's just fantastic. I'll hopefully be back in the new year to try and give him a playmate."

Sue's best friend also went to Dr. Zoll. She delivered a little girl June 13th. By the way, Pam and her husband Robert are having a little girl. She's

due July 21st.
